

## Percent of Kindergarteners Complete for Required Vaccines in School Year 2013-14

Fewer kindergarten students are meeting school-entry vaccine requirements this year compared to last year for all required vaccines. Students with complete immunizations are more protected from getting and spreading vaccine-preventable diseases.

- School year 2013-14 results are based on public and private school reports for 78,924 kindergarteners out of a total enrollment of 81,530.
- Complete for all required vaccines means the student has all required vaccines for kindergarten entry.
- \*Data for school years 2012-13 and 2013-14 is weighted to account for the number of schools that reported.
- [HP2020](#): Healthy People 2020 goal for the percentage of kindergarteners complete for individual vaccines.
